MANUFACTURING

QUALITY AND STYLE

Two manufacturing processes – two results: quality and style |

1 Foams For more elaborate, 3-dimensional forms with love for detail, we use aluminium moulds in which high-density polyurethane foam (ARSTYL®) is injected, resulting in precisely manufactured design elements particularly rich in detail or austere modern. We use this process also to produce our special FLEX mouldings as well as design elements (DOMOSTYL®) which are suitable for outdoor use.

2 Extrusion In the extrusion process, polystyrene is moulded in medium and high density to light (NOMASTYL®) or shock-resistant (WALLSTYL®) design elements. All design elements manufactured by means of extrusion are moreover waterproof and can therefore be used in damp areas without hesitation. Gluing surfaces and a primer facilitate the subsequent processing.

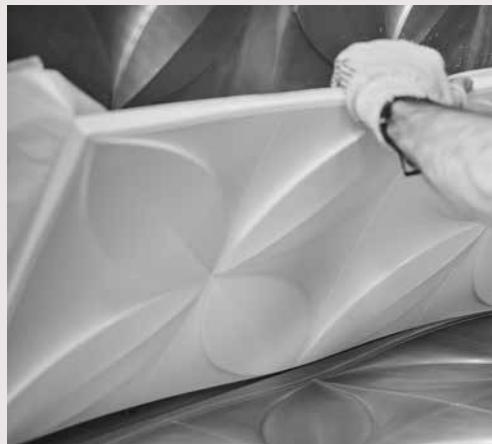

Whatever design elements you opt for, engineers, designers and staff are constantly working in development and production to meet the quality requirements of NOËL & MARQUET. Over 70 years of experience and a distinctly innovative spirit make the appeal, authenticity and quality of NOËL & MARQUET products simply unique.

Deux procédés de fabrication – deux résultats : qualité et style |

1 Moussage Par amour du détail, nous utilisons, pour les formes en relief plus élaborées, des moules en aluminium dans lesquels est injectée de la mousse de polyuréthane haute densité (ARSTYL®). Résultat : des éléments design très précis, tantôt particulièrement riches en détails, tantôt d'un modernisme épuré. Nous utilisons le même procédé pour la production de nos profilés spéciaux FLEX et pour les éléments décoratifs adaptés à l'extérieur (DOMOSTYL®).

2 Extrusion L'extrusion consiste à former des éléments design légers (NOMASTYL®) ou résistants (WALLSTYL®) à partir de polystyrène de moyenne ou de haute densité. Tous les éléments décoratifs fabriqués par extrusion sont en outre résistants à l'eau et donc parfaitement utilisables dans des pièces humides. Les surfaces de collage fraîchies et la couche d'apprêt appliquée en usine facilitent la mise en œuvre ultérieure.

Quel que soit votre choix parmi les éléments décoratifs, les ingénieurs, designers et collaborateurs des départements Développement et Production veillent toujours à répondre aux exigences de qualité de la marque NOËL & MARQUET. Associer plus de 70 années d'expérience à l'esprit éminemment novateur du groupe, rend les produits NOËL & MARQUET absolument uniques par leur attrait, leur authenticité et leur qualité.

Dos procesos de fabricación, dos resultados: calidad y estilo |

1 Espumas Para las formas tridimensionales más complejas, utilizamos, con esmero para los detalles, moldes de aluminio donde se ha inyectado espuma de poliuretano de alta densidad (ARSTYL®), obteniendo elementos de diseño producidos con precisión, particularmente ricos en detalles o bien de un modernismo depurado. Utilizamos el mismo proceso para la producción de nuestros perfiles especiales FLEX y elementos decorativos adecuados para uso en exteriores (DOMOSTYL®).

2 Extrusión En el proceso de extrusión, el poliestireno es moldeado a densidad media o alta para obtener elementos de diseño ligeros (NOMASTYL®) o resistentes (WALLSTYL®). Todos los elementos decorativos hechos por extrusión también son resistentes al agua y, por lo tanto, perfectamente utilizables en habitaciones húmedas. Las superficies de unión fresadas y la capa de imprimación aplicada en fábrica facilitan la instalación posterior. Cualquiera que sea el elemento de diseño que elijas, en el Departamento de Desarrollo y Producción los ingenieros, los diseñadores y todo el personal velan constantemente por responder a las exigencias en materia de calidad de la marca NOËL & MARQUET. La combinación de más de 70 años de experiencia con el espíritu altamente innovador del grupo hace que los productos NOËL & MARQUET sean absolutamente únicos en su atractivo, autenticidad y calidad.

Dois processos de fabrico, dois resultados: qualidade e estilo |

1 Espumas Para as formas tridimensionais relativamente complexas, usamos, com gosto pelos detalhes, moldes de alumínio nos quais é injetada espuma de poliuretano de alta densidade (ARSTYL®). Usamos este processo também para produzir as nossas molduras FLEX especiais, bem como os elementos decorativos (DOMOSTYL®) que podem ser utilizados no exterior.

2 Extrusão A extrusão consiste em formar elementos decorativos leves (NOMASTYL®) ou resistentes (WALLSTYL®) a partir de poliestireno de média ou alta densidade. Todos os elementos decorativos fabricados por extrusão também são resistentes à água e, portanto, podem ser usados sem hesitação em ambientes húmidos. As superfícies de colagem fresadas e o revestimento primário aplicado no seu fabrico facilitam a instalação subsequente.

Seja qual for a sua escolha entre os elementos decorativos: nos departamentos de Desenvolvimento e Produção, engenheiros, designers e colaboradores atendem sempre aos requisitos de qualidade da marca NOËL & MARQUET. A longa experiência de mais de 70 anos e o espírito altamente inovador do grupo tornam os produtos NOËL & MARQUET absolutamente únicos pelo seu apelo, autenticidade e qualidade.

- Los circuitos cerrados reducen el consumo de agua al mínimo
- El grupo cuenta con la certificación ISO 14001, el estándar internacional para sistemas de gestión ambiental
- Todos los productos NOËL & MARQUET están certificados por BREEAM (ARSTYL®, WALLSTYL®, NOMASTYL®)

Assumimos as nossas responsabilidades |

En quanto empresa familiar, a NMC esteve sempre ciente da sua responsabilidade pelas gerações futuras. E essa consciência sobre a eficiência energética, sustentabilidade e proteção climática significa que cada passo no desenvolvimento, produção e venda dos elementos decorativos da NOËL & MARQUET é verificado e otimizado:

- Energia criada a partir do nosso próprio sistema fotovoltaico e energia 100% verde
- Instalação própria de reciclagem que garante quase 100% de reciclagem de resíduos
- Circuitos de água fechados que minimizam o consumo
- Certificação ISO 14001 - a norma internacional para sistemas de gestão ambiental
- Certificação BREEAM para todos os produtos NOËL & MARQUET (ARSTYL®, WALLSTYL®, NOMASTYL®)
- **Os nossos rodapés da NOËL & MARQUET levam o rótulo ecológico alemão Blauer Engel (Anjo azul) por ser um produto de baixa emissão que não coloca em risco a saúde.**

CORNICES

MOULURES DE PLAFOND
MOLDURAS DE TECHO
SANCAS

Create a completely new spatial effect with our cornices. They create an elegant and aesthetic transition between walls and ceilings. The spatial effect can vary depending on the cornice and the mounting. Cornices – many of which are for that matter suitable for the integration of direct or indirect lighting – can moreover be used to conceal unsightly transitions, cracks and smaller cables.

Grâce à nos moulures de plafond, vous pouvez changer à volonté l'ambiance de votre espace intérieur. Elles forment une transition esthétique et élégante entre le mur et le plafond. L'impression d'espace varie selon le profilé et la disposition de la moulure. Les moulures de plafond, dont beaucoup conviennent à l'intégration d'un éclairage direct et indirect, vous permettent aussi de dissimuler les passages, fissures et petits câbles inesthétiques.

Gracias a nuestras molduras de techo, puede cambiar a voluntad la atmósfera de su espacio interior. Forman una transición estética y elegante entre la pared y el techo. El efecto espacial varía según el perfil y la disposición de la moldura. Las molduras de techo, muchas de las cuales son adecuadas para integrar la iluminación directa e indirecta, también le permiten ocultar pasajes antiestéticos, grietas y pequeños cables.

nossas sancas. Criam uma transição elegante e estética entre paredes e tetos. O efeito espacial pode variar dependendo da sanca e da montagem. With our cover skirtings, renovations become simple: old profiles and tiles are easily covered without having to resort to expensive prior removal – a big relief.

Gracias a nuestros cubre zócalos, la renovación se convierte en un juego de niños: hacen que su trabajo sea mucho más fácil, al permitirle simplemente cubrir los zócalos de madera o de cerámica ya existentes, en lugar de tener que eliminarlos primero, evitando así costes innecesarios en la retirada de los mismos que en muchos casos son difíciles y engorrosos de quitar.
